\$12/lb

Flat rate, every pound · no minimum charge · weight rounded up to the next whole pound

1 How our pricing works

A flat rate per pound

You pay **\$12 for every pound** we mail. There is no minimum charge — a light package simply costs less.

Large, light boxes

Bulky but lightweight boxes are billed on **volume**: length × width × height (inches) ÷ 166. We charge the greater of actual vs. volumetric weight.

Weight is rounded up

We round the billed weight **up to the next whole pound** (a 9.2 lb package is billed as 10 lb).

Buy For You & insurance

For **Buy For You**, the cost of the items is billed separately from mailing. **Insurance** is optional and quoted separately.

Example. A 20 lb package is $20 \times \$12 =$ **\$240**. A large, light box measuring 24" × 18" × 12" has a volumetric weight of $5,184 \div 166 \approx 32$ lb, so it is billed at $32 \times \$12 =$ **\$384** even if it weighs less on the scale.
